

US-EU NanoEHS CoR Risk Assessment

Derk H. Brouwer, Mark Wiesner,
Christine Hendren, Janeck J. Scott-Fordsmand

Agenda

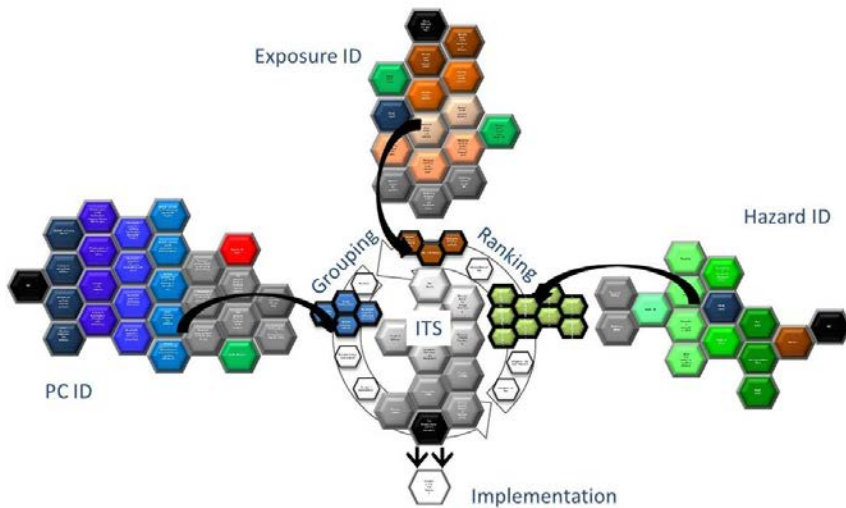

- Follow up on scrimmage – will be evaluated and novel approaches will be done at a later stage when further areas are defined.
- US and EU progress on Risk Assessment (identify common targets in the progress).
- Defining concrete and workable RA-group goals for 2015 (e.g. databases)
- Outlining practical issues e.g. meeting frequency etc

CoR Risk Assessment 2015

- Progress with State of Art on RA review
- Based on RA approaches - identify data types from other areas - hazard, exposure, etc.
- Identify trends - materials where the driver is exposure and where the driver is hazard
- Building on simple case studies and progress in RA development in US and EU.

Bimonthly meetings (fixed dates), Agenda 1 week ahead, minutes, etc, focus on communication
